

Dear Students of Lake Tech,

February 15, 2016

Mack industries located in Astatula, Florida, is interested in providing a unique opportunity for students and graduates to join our company.

It is our desire to recruit interested parties into a training and development program on a full or part time basis. This program will be geared towards those people who are pursuing general, vocational, or technical courses of study.

The opportunities at Mack Industries are diverse and all-encompassing as a major manufacturing company. Mack manufactures a wide range of precast concrete products for the infrastructure and transportation industries. Areas of specialty within the company include, manufacturing; concrete design and batching; engineering/drafting; scheduling; delivery; maintenance of plant, machinery and fleet; concrete component field installation; project management; administration; quality control; data processing and information technology; management; accounting and marketing; and sales.

In a work/school relationship, the part-time employee would undertake a training regime that would offer the individual a valuable head start to a career with the company.

Those joining the company on a full time basis would engage in a training program geared to their chosen career track.

Please visit our website at www.mackconcrete.com for more information on our company. Job applications are available in the Careers section of the website. Please forward your application to the address below or feel free to contact me.

Sincerely,

Tom Holmes
